

**R-A-V-BWZ-2A**

This model is designed specifically for use in AC power line applications. This model uses specially treated discharge electrodes for greatly enhanced noise immunity test and surge life making it optimum for the protection of single-phase power supply circuits.

**R-A-V-BXZ-2A**

This model is designed specifically for use in three-phase power circuit applications. Combing multiple PAVs with specially treated electrodes for greatly enhanced noise immunity test and surge life, this model is constructed in a unit-molded body.

**R-A-V-BYZ-2**

This model is designed specifically for use in three-phase power circuit applications. It is designed to protect against "normal mode" noise transient surges.

When used in conjunction with the RAV-BXZ-2A, it will furnish complete protection of equipment from both Normal and Common mode transient voltage surges.
